(54) TRICYCLIC COMPOUND

(57)Abstract:

PURPOSE: To obtain a new compound having excellent antihistaminic action and antiallergic action and useful for allergic diseases and bronchial asthma, etc.

CONSTITUTION: A compound of formula I [R¹ is lower alkyl or lower alkoxy; R² is H or lower alkyl; Y is (lower alkyl-substituted)1-5C alkylene] and its pharmacologically permissible salt, e.g. [4(5,1 l-dihydro-8- methylbenz[b]oxepino[4,3-b]pyridin-11-ylidene) piperidino]acetic acid ethyl ester. This compound of formula I is obtained by reacting, e.g. a compound of formula II with a compound of the formula Z-Y-CO₂R³ (R³ is lower alkyl; Z is halogen) without or in an organic solvent or in the presence or absence of chlorine as a dehydrohalogenation agent to carry out N-alkylation of the compound of formula II and, as necessary, hydrolyzing the resultant product.
